A four-day course which equips the participant to use Dementia Care Mapping™ within the organisation.

At the end of this course the participant will be able to:
- Understand person centred dementia care, and its application in practice
- Describe the psychological needs of people with dementia, and ways to meet them
- Use DCM™ to assess and make recommendations for the realisation of person centred dementia care
- Brief colleagues on the use of DCM™

The course covers:
- The underlying philosophy of person-centred care
- The four coding frames used in Dementia Care Mapping™
- The rules governing coding, processing of the data and practical issues around briefing and feeding back to care staff

What is Dementia Care Mapping?

Dementia Care Mapping™ (DCM™) is an established approach to achieving and embedding person-centred care for people with dementia. It has been used for over 20 years by care practitioners to improve the quality of life for people living with dementia in a range of care settings, including care homes and hospitals.

The benefits of DCM™ include the improvement of people’s well-being, enabling staff to see care from the point of view of the person living with dementia, leading to evidence-based feedback and action planning that motivates staff and helps them to feel more confident in implementing person-centred care.
Workshop Trainers:

Virginia Moore

Virginia is a Registered Occupational Therapist and has worked in Senior Management positions within Aged Care sectors of the Australian healthcare system for more than 30 years. As a past member of both the National and State Board of Alzheimer’s Australia, she has a clear understanding of the broader issues related to our aging populations. Virginia has been providing training in the use of DCM™ in Australia and Singapore since 2002.

Carol Fusek

Carol currently provides her services and knowledge as a member of the Alzheimer’s Disease Association, ADA, in Singapore. In this capacity, she is appointed as the strategic lead for Dementia Care Mapping in Singapore, and provides support for the development and delivery of Person-Centred Care (PCC) training. She was a member of the Social Service Institute’s PCC Community of Practice team. Carol is certified by the University of Bradford, UK, as a DCM trainer since 2013.

Dementia Care Mapping (DCM™) for Realising Person Centred Care

Course Details

Classroom Training:
Date
12,13, 23 & 24 October 2017

Co-mapping sessions schedule:

<table>
<thead>
<tr>
<th>Date</th>
<th>Time</th>
<th>Venue</th>
</tr>
</thead>
<tbody>
<tr>
<td>16/ 17 Oct</td>
<td>9-12am OR 2-5pm</td>
<td>TBC</td>
</tr>
</tbody>
</table>

Each time slot allows up to 3 participants; please indicate your preferred timing upon registration. Venue for mapping can be arranged at your centre or nursing home.

Time
9am – 6pm

Course Fee
$1,650.00

For Whom
This course is intended for Healthcare practitioners from hospitals, intermediate and long term care providers, who provide care for older persons, including persons with dementia, including doctors, allied health professionals, nurses, programme coordinators and executives.

Key Takeaways
Participants will be able to evaluate and influence care practices, and enhance the wellbeing of persons with dementia and staff through appropriate use of the Dementia Care Mapping tool.

Registration
 Applicants please register for the course online at the Registration page following the link below:
